EUROPEAN COMMISSION
DIRECTORATE-GENERAL FOR HEALTH AND FOOD SAFETY

Food and feed safety, innovation
Biotechnology

Brussels
SANTE.DDG2.E.3/PM/GM 2599554

Dear Sir, / Dear Madam,

Subject: Study supporting the Impact Assessment on a legislation for plants produced by certain new genomic techniques - SANTE/2021/E3/086

The Directorate General for Health and Food Safety (DG SANTE) of the European Commission has launched a study to support the impact assessment for a legislation for plants produced by certain new genomic techniques. The study is conducted by Ecorys, Technopolis Group, Arcadia International, and Wageningen University Research. The contract runs from March 2022 to June 2023.

The aim of the study is to provide data, analysis and evidence for the Commission to assess the impacts of a possible new legislation.

As part of this study, the contractor is consulting with targeted stakeholder groups and public authorities to collect relevant data and views.

This consultation is a key source of information for the assignment. I would be grateful if all persons contacted would provide their full support and contribute to this important study by engaging with the contractor to the best extent possible for the quality and success of this study.

The progress of the study will be reported on a regular basis to the Commission. If you have any questions on the study, please feel free to contact the team leader at Technopolis, Dr. Viola Peter at NGTstudy@technopolis-group.com, or DG SANTE at SANTE-NGT-STUDY@ec.europa.eu

Thank you in advance for your kind cooperation.

Yours sincerely,

Irene SACRISTAN SANCHEZ
Head of Unit
